Mountain View, CA: [ANTRIX Corporation Limited](https://antrix.com) (ANTRIX), a wholly-owned Government of India Company, has signed a Memorandum of Understanding (MOU) with satsearch.co (satsearch) to showcase specific products and services offered by the Indian space sector. By signing this MOU, ANTRIX aims to tap into global reach offered through the satsearch platform, to highlight the core technologies mastered by the Indian space supply chain. Satsearch hopes to be a catalyst in the process of search and discovery of space products from the Indian Space Research Organisation (ISRO), which can be procured through ANTRIX.

Interest in the Indian space supply chain has grown rapidly, especially in recent years due to a number of notable successes, including [successfully delivering a spacecraft to Mars on the first attempt](#), breaking the record by [successfully delivering 104 satellites to orbit on a single](#)

[launcher](#), and successfully launching the [first developmental flight of India's heavy lift launch vehicle GSLV Mk-III](#). This partnership offers an opportunity to capitalize on growing interest, as ANTRIX serves as the official point-of-contact for entities that seek to procure Indian space systems, subsystems and components.

“Signing this MOU with ANTRIX signals the next step in our journey to consolidate the global space supply chain”, said Kartik Kumar, Co-founder and CEO at [satsearch.co](#). “The Indian space supply chain includes state-of-the-art products, services, and technologies with proven flight heritage that offer tremendous opportunities for commercial space. We are excited to help showcase these capabilities and stimulate new relationships within the global space market.”

Recently, the [satsearch](#) platform crossed 5,000 products and 700 suppliers, including over 100 Indian organizations. Users can navigate through the Indian space supply chain using the [satsearch](#) [supplier map](#). A number of ANTRIX products can be found on [satsearch](#) already.

This MOU signals the intent of both organizations to showcase unique skills and competences within India that are essential for sustained growth of the global space industry.
